Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,2 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Demars in view of Yang.

Demars discloses a rotary tray 6, receiving pan 24, and base plate 4 having an annular groove. Providing an additional flange to support the pans would have been well within the purview of one of ordinary skill in the art so as to provide more support for the pans as well as to rigidify the tray. Regarding the holes in the pans, such is well known as disclosed by Yang at 20. In view of this teaching, it would have been obvious to provide the pans 24 of Demars with such holes so as to promote cooling.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Demars in view of Yang as applied above, and further in view of McNeeley et al.

Claim 3 recites conventional attachment means for a tray to a turntable, as evidenced by McNeeley et al at 80,82. In view of this teaching, it would have been obvious to provide Demars with such a positive attachment to prevent unwanted disassembly.

Claims 1,4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huang et al.

Art Unit: 3634

See tray 3, pans 52,62, etc., and base 2. What is not shown are the holes in the pans. However, providing holes for egress of debris is well known in the desk rack art and it would have been obvious to provide such holes in the pans for this purpose. See inwardly extending supporting flange 7.
